Family-owned and operated since William M. Dempsey, Sr. founded the present corporation in May, 1944, American Heating & Air Conditioning Co. has opened a new location on Red Bank Road in the building that formerly housed the UAW for the Ford Plant that had been located across the street. "Most of our business is on the eastside," says Dave Dempsey,

*The new location for American Heating & Cooling Co. is 3953 Red Bank Road. On display in the new office space are photos and professional credentials.*

whose wife Kathy is from Mt. Lookout. Dave and his brother Mike, from Hyde Park, are the third generation to manage the company.

Dave is the President of American Heating & Air Conditioning Co. A graduate of St. Xavier High School, he received his degree in Business Administration from Xavier University. His hands-on training in the business started in high school and continued through college and beyond. Dave manages all sales and installations, and he has served on the Board of Greater Cincinnati Heating and Cooling Association. Dave and Kathy have two children - Chris and Alison.

Mike, the company Vice President, also graduated from St. Xavier High School and obtained his Business Administration degree at the University of Dayton. He

manages all of the business finances and helps with sales. Mike has served on the Board of Directors for the Home Business Association and Big Brothers/Big Sisters of Greater Cincinnati. He and his wife Sue have two children, Katie and Brian.

American Heating & Air Conditioning Co. provides a variety of services including expert system design, quality installation, reliable service and service agreements. "We mainly are a Carrier dealer," says Dave, "but we service any brand."

The company offers a network of support from its professionals whose long history of serving the community is well established. As the company flyer says, "Chances are that American installed the first boiler in *your* dad's house, or put the first HVAC system in the office or plant where he worked!" American prides itself on caring about its work to ensure long-standing relationships with its customers.

And they seem to be succeeding, as Dave notes, "We're the second most Googled business of its kind in the city - the first is windows!"

American Heating & Cooling Co. is located at 3953 Red Bank Road (across from Walmart and Wendy's). Please call (513) 271-COOL or visit [www.american-heat.com](http://www.american-heat.com) for more information.
